

IN THE CLAIMS

Listing of claims

The following listing of claims will replace all previous versions and listings of claims.

1. (Cancelled)
2. (Cancelled) ~~A method of supplying bagged ice, comprising the steps of:~~

~~a. supplying a bag for bagging ice; and,~~
~~b.a. identifying said bag via means for bag identification.~~
3. (Cancelled) ~~The method of Claim 2, wherein said step of identifying said bag via said identification means comprises a computer controlled sensor for reading and measuring indicia carried by said bag for yielding a first measured value, said sensor selected from the group consisting of photoelectric eyes, laser eyes, laser technology and barcode technology.~~
4. (Cancelled) ~~The method of Claim 3, further comprising the step of reading and measuring a distance between said indicia via said sensor for yielding a second measured value.~~
5. (Cancelled) ~~The method of Claim 4, further comprising the step of comparatively analyzing said first and second measured values against computer defined pre-programmed values to identify and verify the authenticity of said bag for ice filling purposes.~~

PATENT

6. (Cancelled) ~~The method of Claim 5, further comprising the step of permitting said bag to be filled with ice only if said first and second measured values correspond to said pre-programmed values.~~

7. (Cancelled) ~~The method of Claim 5, further comprising the step of prohibiting said bag from being filled with ice if said first and second measured values do not correspond to said pre-programmed values.~~

8. (Cancelled) ~~The method of Claim 5, further comprising the step of permitting said bag to be filled with ice even if said first and second measured values do not correspond to said pre-programmed values.~~

9. (Cancelled) ~~A bag for use in an ice making, bagging and storing machine, said bag comprising:~~

~~—— a first indicia carried by said bag, said indicia readable and measurable via means for sensing to identify and verify the authenticity of said bag for use in the ice making, bagging and storing machine.~~

10. (Cancelled) ~~The bag of Claim 9, wherein said bag comprises at least a second indicia, said second indicia also readable and measurable via said sensing means.~~

PATENT

11. (Cancelled) ~~The bag of Claim 10, wherein said sensing means comprises a computer-controlled sensor for reading and measuring said first and second indicia carried by said bag for yielding a first and second measured value, respectively, said sensor selected from the group consisting of photoelectric eyes, laser eyes, laser technology and barcode technology.~~

12. (Cancelled) ~~The bag of Claim 11, wherein said sensor reads and measures a selected distance between said first and second indicia for yielding a third measured value.~~

13. (Cancelled) ~~The bag of Claim 12, wherein said sensor first reads and measures said first indicia, then said selected distance, and then said second indicia.~~

14. (Cancelled) ~~The bag of Claim 13, wherein said first, second, and third measured values are comparatively analyzed against computer defined pre-programmed values to identify and verify the authenticity of said bag for use in the ice making, bagging and storing machine.~~

15. (Cancelled) ~~The bag of Claim 14, wherein said bag is permitted to be utilized in the ice making, bagging and storing machine only if said first, second and third measured values correspond to said pre-programmed values.~~

16. (Cancelled) ~~The bag of Claim 14, wherein said bag is not permitted to be utilized in the ice making, bagging and storing machine if said first, second and third measured values do not correspond to said pre-programmed values.~~

PATENT

17. (Cancelled) ~~The bag of Claim 14, wherein said bag is permitted to be utilized in the ice making, bagging and storing machine even if said first, second and third measured values do not correspond to said pre-programmed values.~~

18. (Cancelled) ~~The bag of Claim 14, wherein at least one of said first and second indicia is a label section.~~

19. (Cancelled) ~~The bag of Claim 14, wherein at least one of said first and second indicia is selected from the group consisting of colors, barcodes, shapes, reference characters, letters and numbers.~~

20. (Cancelled) ~~A method of identifying a bag for use in an ice making, bagging and storing machine, said method comprising the steps of:~~

~~a. obtaining a bag comprising a first indicia carried thereon; and,~~

~~b. a. utilizing a computer controlled sensor to read and measure said first indicia to identify and verify the authenticity of said bag for use in the ice making, bagging and storing machine.~~

21. (Cancelled) ~~The method of Claim 20, wherein said bag further comprises at least a second indicia, said second indicia also readable and measurable via said computer controlled sensor.~~

PATENT

22. (Cancelled) ~~The method of Claim 21, further comprising the step of permitting said computer-controlled sensor to read and measure said first and second indicia to yield a first and second measured value, respectively.~~

23. (Cancelled) ~~The method of Claim 22, further comprising the step of permitting said computer-controlled sensor to read and measure a selected distance between said first and second indicia for yielding a third measured value.~~

24. (Cancelled) ~~The method of Claim 23, further comprising the step of permitting said computer-controlled sensor to first read and measure said first indicia, then said selected distance between said first and second indicia, and then said second indicia.~~

25. (Cancelled) ~~The method of Claim 24, further comprising the step of comparatively analyzing said first, second, and third measured values against computer-defined pre-programmed values to identify and verify the authenticity of said bag for use in the ice making, bagging and storing machine.~~

26. (Cancelled) ~~The method of Claim 25, further comprising the step of permitting said bag to be utilized in the ice making, bagging and storing machine only if said first, second and third measured values correspond to said pre-programmed values.~~

PATENT

27. (New) ~~The method of Claim 25, further comprising the step of prohibiting said bag from being utilized in the ice making, bagging and storing machine if said first, second and third measured values do not correspond to said pre-programmed values.~~

28. (Cancelled) ~~The method of Claim 25, further comprising the step of permitting said bag to be utilized in the ice making, bagging and storing machine even if said first, second and third measured values do not correspond to said pre-programmed values.~~

29. (Cancelled) ~~The method of Claim 25, wherein at least one of said first and second indicia is a label section.~~

30. (Cancelled) ~~The method of Claim 25, wherein at least one of said first and second indicia is selected from the group consisting of colors, barcodes, shapes, reference characters, letters and numbers.~~

31. (Cancelled) ~~An ice bagging apparatus, comprising:
a slider box configured to receive ice from at least one icemaker, said slider box adapted to slidably transport the ice for subsequent deposit of same into a bag.~~

32. (New) An ice bagging apparatus comprising:
means for producing ice;
means for bagging the ice produced by said means for producing ice, wherein said means for bagging comprises at least one box slidably engaged with at least one tray, said at least one

PATENT

box adapted to receive the ice produced by said means for producing ice, and wherein said at least one tray is positioned at an angle relative to a ground surface;

means for dispensing the bagged ice; and,

means for identifying a bag.

33. (New) The ice-bagging apparatus of claim 32, wherein said means for identifying a bag comprises a computer-controlled sensor for reading and measuring indicia carried by said bag for yielding a first measured value, said sensor selected from the group consisting of photoelectric eyes, laser eyes, laser technology and barcode technology.

34. (New) The ice-bagging apparatus of claim 32, wherein said bag comprises a first indicia carried by said bag, said first indicia readable and measurable via means for sensing to identify and verify the authenticity of said bag for use in said ice-bagging apparatus.

35. (New) The ice-bagging apparatus of claim 34, wherein said bag further comprises a second indicia, said second indicia being readable and measurable via said sensing means.

36. (New) The ice-bagging apparatus of claim 35, wherein said sensing means comprises a computer-controlled sensor for reading and measuring said first and second indicia carried by said bag for yielding a first and second measured value, respectively, said sensor selected from the group consisting of photoelectric eyes, laser eyes, laser technology and barcode technology.

PATENT

37. (New) The ice-bagging apparatus of claim 35, wherein said sensor reads and measures a selected distance between said first and second indicia for yielding a third measured value.

38. (New) The ice-bagging apparatus of claim 37, wherein said sensor first reads and measures said first indicia, then said selected distance, and then said second indicia.

39. (New) The ice-bagging apparatus of claim 37, wherein said first, second, and third measured values are comparatively analyzed against computer-defined pre-programmed values to identify and verify the authenticity of said bag for use in said ice-bagging apparatus.

40. (New) The ice-bagging apparatus of claim 39, wherein said bag is permitted to be utilized in said ice-bagging apparatus only if said first, second and third measured values correspond to said pre-programmed values.

41. (New) The ice-bagging apparatus of claim 39, wherein said bag is not permitted to be utilized in said ice-bagging apparatus if said first, second and third measured values do not correspond to said pre-programmed values.

42. (New) The ice-bagging apparatus of claim 39, wherein said bag is permitted to be utilized in said ice-bagging apparatus even if said first, second and third measured values do not correspond to said pre-programmed values.

PATENT

43. (New) The ice-bagging apparatus of claim 35, wherein at least one of said first and second indicia is a label section.

44. (New) The ice-bagging apparatus of claim 35, wherein at least one of said first and second indicia is selected from the group consisting of colors, barcodes, shapes, reference characters, letters and numbers.
